Seed Catalogue 2012

Tel: + 254 706 825555 / Mob: +254 735 196622
www.royalseed.biz
Dear Customer,

Welcome to our new Seed Catalogue for 2012.

Kenya Highland Seed (KHS) was established in 1998 and has been supplying Open Pollinated and Hybrid seeds since 2000. We have an extensive portfolio of established hybrids under our brand ‘Royal Seed’, including Tomatoes, Cabbages, Onions, Peppers, Carrots and Kale (sukuma wiki), and sell a wide range of large and small vegetable seeds with particular focus on high yielding hybrids.

Our 2012 catalogue gives full details of all our product range, broken down into two sections—Domestic and Export and at the end you will find a useful “Shopping List” to complete and fax back to us.

From time to time we also offer discounts and special offers, details of which you can find on our website home page, along with details of new products as they are available, so be sure to visit the site so you don’t miss out!

We hope you enjoy looking through our catalogue and we look forward to doing business with you in the future.

Domestic Product Range

Tomatoes

**OXLY:** An improved Rio-Grande type with oval fruits suitable for all markets.

**Characteristics:**
- Determinate
- Maturity 75 days from transplanting
- Fruit weight 90 - 100 grams
- Yield potential 12-16 tonnes per acre
- Very good shelf life and transportability
- Very fast germinating with vigorous plants

**Resistances / Tolerances:**
- Good tolerance against Leaf Roll Virus

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

**RAMBO F1:** An excellent determinate tomato with perfect oval shape - wilt tolerant variety

**Characteristics:**
- Determinate
- Maturity 75 days from transplanting
- Fruit weight 150 grams
- Yield potential 30 tonnes per acre
- Very good shelf life and transportability
- Vigorous plant with uniformly set and firm fruits
- Excellent fruit grade out up to 90% in grade one

**Resistances / Tolerances:**
- High bacterial wilt tolerant
- Fusarium Wilt (Fol: 1,2)
- Verticillium Wilt (Vd & Va)
- Bacterial Spot
- Nematode

**Pack Sizes:**
- 1 gram: Foil Packet
- 2.5 grams: Foil Packet
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
SANDOKAN F1: An excellent outdoor tomato with perfect oval shape

Characteristics:
- Determinate
- Maturity 75 days from transplanting
- Fruit weight 150 grams
- Yield potential 30 tonnes per acre
- Excellent shelf life and transportability

Resistances / Tolerances:
- Tomato Spotted Wilt Virus (TSWV)
- Fusarium Wilt (Fol: 1,2)
- Verticillium Wilt (Vd & Va)
- Bacterial Spot
- Nematode

Pack Sizes:
- 1 gram: Foil Packet
- 2.5 grams: Foil Packet
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

CHONTO F1: A premium green house tomato with blocky heavy fruits

Characteristics:
- Indeterminate
- Maturity 75 days from transplanting
- Fruit weight 150 - 200 grams
- Yield potential 120 - 150 Kgs per Sq. M. in greenhouse & 65 tonnes per acre outdoor
- Long shelf life of up to 21 days at room temp.
- Strong calyx retention and long harvest period

Resistances / Tolerances:
- Tomato Yellow Leaf Curl Virus (TYLCV)
- Cucumber Mosaic Virus (CMV)
- Tomato Mosaic Virus (ToMV)
- Fusarium Wilt (Fol: 1,2)
- Verticillium Wilt (Vd & Va)
- Grey Leaf Spot
- Nematode

Pack Sizes:
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

As you can see from the photo on the left, all our products are sold in our own branded, high quality packaging.

Depending on the product you choose you will either receive them sold by weight in grams or by individual seed count.

Again depending on product they will be packed in either Foil Packets, Tins or for large quantities in plastic bags.

No expense is spared to ensure that you receive the highest quality product at the most affordable prices.
**BRAVO F1: A premium green house tomato with oval fruits**

**Characteristics:**
- Indeterminate
- Maturity 75 days from transplanting
- Fruit weight 120 - 150 grams
- Yield potential 100-130 Kgs per Sq. M. in greenhouse & 62 tonnes per acre outdoors
- Long shelf life of up to 21 days at room temp
- Adapts well to a wide range of agro-ecological zones
- Long harvest period

**Resistances / Tolerances:**
- Tomato Yellow Leaf Curl Virus (TYLCV)
- Fusarium Wilt (Fol: 1,2)
- Verticillium Wilt (Vd & Va)
- Grey Leaf Spot
- Nematode

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

---

**MAVUNO F1: Ideal green house variety**

**Characteristics:**
- Indeterminate
- Maturity 70 days from transplanting
- Fruit weight 100-130 grams
- Yield potential 100-110 Kgs per Sq. M in greenhouse. 60 tonnes per acre outdoor
- Long shelf life of up to 21 days at room temperature
- Fruit setting continuous and can harvest up to 12 months

**Resistances / Tolerances:**
- Bacterial Wilt (Ps/Rs) high tolerance
- Fusarium Wilt (Fol: 0,1)
- Tomato Mosaic Virus (ToMV)
- Blossom end rot tolerance
- Nematode

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

---

The result of excellent setting
Easy and uniform setting
Perfect Truss
OXLY PREMIUM F1: An advanced version of Oxly, professionally done through Conventional Genetic Improvement (CGI).

Characteristics:
- Determinate
- Maturity 70 days
- Fruit weight 90 -110 grams
- Yield potential 25 tonnes per acre
- Very firm fully filled oval fruits with high market demand
- Very prolific plant with concentrated flower and fruit setting ability

Resistances / Tolerances:
- Fusarium Wilt (Fol: 1,2)
- Verticillium Wilt (Vd & Va)

Pack Sizes:
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

Cabbages

PRETORIA F1: A hybrid fresh market cabbage with excellent heat tolerance.

Characteristics:
- Excellent field holding capacity
- Maturity 75 days from transplanting
- Head weight 4-5 Kgs
- Yield potential 60 tonnes per acre
- Excellent Wrapper leaves and heat tolerance
- Dark green in colour

Resistances / Tolerances:
- Fusarium Yellow

Pack Sizes:
- 1 grams: Foil Packet
- 2.5 grams: Foil Packet
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Cabbage—”Interesting Facts”
- Cabbage is an excellent source of vitamin C.
- It also contains significant amounts of glutamine, an amino acid that has anti-inflammatory properties.
- Along with Broccoli and other Brassica vegetables, cabbage is a source of indole-3-carbinol, a chemical that boosts DNA repair in cells and appears to block the growth of cancer cells.
- In European folk medicine, cabbage leaves are used to treat acute inflammation.
- Fresh cabbage juice has also been shown to promote rapid healing of peptic ulcers.

BLUE JAYS F1: *A very early maturing cabbage*

**Characteristics:**
- Excellent field holding capacity
- Maturity 55 days from transplanting
- Head weight 3 Kgs
- Yield potential 50 tonnes per acre
- Excellent Wrapper leaves and heat tolerance
- Blue Green in colour

**Resistances / Tolerances:**
- Fusarium Yellow
- Mid tolerance to Black Rot

**Pack Sizes:**
- 1 grams: Foil Packet
- 2.5 grams: Foil Packet
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

COPENHAGEN MARKET: *The great legendary cabbage*

**Characteristics:**
- A well adapted cabbage with an exceptional taste
- Maturity 65 days from transplanting
- Head weight 2.5-3 Kgs
- Yield potential 30-35 tonnes per acre
- Early maturing and low crop protection cost
- Dark green in colour with a bright heart

**Resistances / Tolerances:**

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

**Onions**

**BOMBAY RED: An excellent red onion with high market demand**

**Characteristics:**
- Very pungent onion
- Maturity 150 days from transplanting
- Very popular red onion with farmers and the market
- Yield potential 16 tonnes per acre
- Excellent shelf life and transportability
- Deep purple red colour

**Resistances / Tolerances:**

**Pack Sizes:**
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
RED CREOLE: A standard OP red onion with good market demand

Characteristics:
- Well adapted to diverse climatic conditions
- Maturity 150 days from transplanting
- Ideal onion for the fresh market
- Yield potential 16 tonnes per acre
- Good storage quality
- Deep red colour

Pack Sizes:
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Resistances / Tolerances:

TEXAS EARLY GRANO: An excellent white onion with mild pungency

Characteristics:
- A high yielding variety well adapted for the tropics
- Maturity 120 days from transplanting
- Very popular white onion with farmers and the market
- Yield potential 21 tonnes per acre
- Excellent shelf life and transportability
- White colour with golden exterior

Pack Sizes:
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Resistances / Tolerances:

RED PINOY F1: A very early maturing hybrid variety

Characteristics:
- Well adapted onion to both rain fed and irrigation
- Maturity only 90 days from transplanting
- Strong pungency
- Yield potential 30 tonnes per acre
- Long shelf life of up to 6 months at room temperature
- Deep red attractive bulbs with a high market demand

Pack Sizes:
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Resistances / Tolerances:
- Downy Mildew
- Purple Blotch Tolerance

Some Medicinal properties of Onions:
- Wide-ranging claims have been made for the effectiveness of onions against conditions ranging from the common cold to heart disease, diabetes, osteoporosis, and other diseases. They contain chemical compounds believed to have anti-inflammatory, anticholesterol, anticancer, and antioxidant properties, such as quercetin. Preliminary studies have shown increased consumption of onions reduces the risk of head and neck cancers.
- Onions may be beneficial for women, who are at increased risk for osteoporosis as they go through menopause, by destroying osteoclasts so they do not break down bone.

Peppers

SWEET PEPPER MAXIBELL: A refined open pollinated sweet pepper with heavy fruiting ability

- **Characteristics:**
  - Standard glossy green blocky fruits
  - Maturity 75 days from transplanting
  - Fruit weight 120-150 grams
  - Yield potential 8 tonnes per acre
  - Shelf life
  - Ideal for both green house and open field
  - Deep green coloured fruits

- **Resistances / Tolerances:**
  - Tobacco Mosaic Virus (TM1)
  - Downy Mildew
  - Purple Blotch Tolerance
  - Anthocyanin Tolerance

- **Pack Sizes:**
  - 5 grams: Foil Packet
  - 10 grams: Foil Packet
  - 25 grams: Foil Packet
  - 50 grams: Tin
  - 100 grams: Tin
  - 250 grams: Tin
  - 500 grams: Tin
  - 1000 grams: Plastic Bag

YOLO WONDER: A standard open pollinated variety with high market demand

- **Characteristics:**
  - Green blocky fruits
  - Maturity 80 days from transplanting
  - Fruit weight 100-120 grams
  - Yield potential 6 tonnes per acre
  - A vigorous, erect and compact plant adapted to warm climatic conditions
  - Deep green coloured fruits

- **Resistances / Tolerances:**
  - Tobacco Mosaic Virus (TM1)

- **Pack Sizes:**
  - 10 grams: Foil Packet
  - 25 grams: Foil Packet
  - 50 grams: Tin
  - 100 grams: Tin
  - 250 grams: Tin
  - 500 grams: Tin
  - 1000 grams: Plastic Bag

CALIFORNIA WONDER: A standard open pollinated variety with continuous picking

- **Characteristics:**
  - Sweet pepper with green blocky fruits
  - Maturity 80 days from transplanting
  - Fruit weight 100-120 grams
  - Yield potential 6 tonnes per acre
  - A very hardy, strong and vigorous plant
  - Deep green coloured fruits turning red at full maturity

- **Resistances / Tolerances:**

- **Pack Sizes:**
  - 10 grams: Foil Packet
  - 25 grams: Foil Packet
  - 50 grams: Tin
  - 100 grams: Tin
  - 250 grams: Tin
  - 500 grams: Tin
  - 1000 grams: Plastic Bag
Carrots

NANTES: *A long straight tasty carrot*

**Characteristics:**
- Very attractive internal flesh with high vitamin content
- Cylindrical and straight with a rounded tip
- Maturity 110 days from planting
- Length 17-20cms plus
- Yield potential 17 tonnes per acre
- Small core with excellent uniformity
- Deep orange colour

**Resistances / Tolerances:**
- Partial tolerance to Powdery Mildew

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

SUPER KURODA: *An excellent carrot well adapted to tropical areas*

**Characteristics:**
- Very attractive internal flesh with high vitamin content
- Straight tapered to a point
- Maturity 110 days from planting
- Length 19 cms plus
- Yield potential 17 tonnes per acre
- Heat tolerant and suitable for tropical areas
- Deep orange colour

**Resistances / Tolerances:**

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

**Carrots - Interesting Facts:**
- The sweetness of carrots allows the vegetable to be used in some fruit-like roles. Grated carrots are used in carrot cakes, as well as carrot puddings, an old English dish thought to have originated in the early 19th century. Carrots can also be used alone or with fruits in jam and preserves. Carrot juice is also widely marketed, especially as a health drink, either stand-alone or blended with fruits and other vegetables.
- Carrots are useful companion plants for gardeners. There is experimental evidence that growing it intercropped with tomatoes increases tomato production. If left to flower, it (like any umbellifer) attracts predatory wasps which kill many garden pests.
- The carrot gets its characteristic and bright orange colour from β-carotene, which is metabolised into vitamin A in humans when bile salts are present in the intestines.

# Eggplant

## BLACK BEAUTY: *Standard open pollinated variety with dark purple skin*

**Characteristics:**
- A long picking period of up to 6 months
- A large bush plant with egg shaped fruits
- Maturity 90 days from transplanting
- Excellent flavour
- Yield potential 4-6 fruits per plant

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

## LONG PURPLE: *Standard variety with purple skin*

**Characteristics:**
- Good quality fruits with a good market demand
- Tall and upright plant with slender oblong fruits
- Maturity 85 days from transplanting
- Excellent flavour
- Yield potential 6-8 fruits per plant

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

---

#### Eggplant—Useful Information:

- The **eggplant**, **aubergine**, **melongene**, **brinjal** or **guinea squash** (*Solanum melongena*) is a plant of the family Solanaceae (also known as the nightshades) and genus *Solanum*. It bears a fruit of the same name, commonly used in cooking. As a nightshade, it is closely related to the tomato and potato.

- It is a delicate perennial often cultivated as an annual. It grows 40 to 150 cm (16 to 57 in) tall, with large coarsely lobed leaves that are 10 to 20 cm (4–8 in) long and 5 to 10 cm (2–4 in) broad. Semiwild types can grow much larger, to 225 cm (7 ft) with large leaves over 30 cm (12 in) long and 15 cm (6 in) broad. The stem is often spiny. The flowers are white to purple, with a five-lobed corolla and yellow stamens.

- The fruit is fleshy, has a meaty texture, and is less than 3 cm (1.2 in) in diameter on wild plants, but much larger in cultivated forms. The fruit is botanically classified as a berry and contains numerous small, soft seeds which are edible, but have a bitter taste because they contain nicotinoid alkaloids; this is unsurprising as it is a close relative of tobacco.

Source: wikipedia.org
Kale and Collard

**KALE - THOUSAND HEADED: A tall long picking period succulent kale**

**Characteristics:**
- Vigorous plants with many side branches
- Very leafy product with continuous picking
- Maturity 60 days from planting
- Indeterminate very hardy product with ability to recover easily
- Yield potential 8 tonnes per acre
- Very good heat tolerance
- Light green coloured leaf

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

**Resistances / Tolerances:**

**COLLARD SOUTHERN GEORGIA: A large dark green leaved product**

**Characteristics:**
- Loose headed plant with heavy ribs and spreading leaves
- Average weight 1 kg per plant
- Maturity 60 days from planting
- Determinate very leafy plant
- Yield potential 6 tonnes per acre
- Good heat tolerance
- Dark green coloured leaf

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

**Resistances / Tolerances:**

**Kale - Nutritional Value:**
Kale is very high in beta carotene, vitamin K, vitamin C, lutein, zeaxanthin, and reasonably rich in calcium. Kale, as with broccoli and other brassicas, contains sulforaphane (particularly when chopped or minced), a chemical with potent anti-cancer properties. Boiling decreases the level of sulforaphane; however, steaming, microwaving, or stir frying do not result in significant loss. Along with other brassica vegetables, kale is also a source of indole-3-carbinol, a chemical which boosts DNA repair in cells and appears to block the growth of cancer cells. Kale is also a good source of carotenoids.

**Collard - Nutritional Vale:**
Widely considered to be a healthy food, collards are good sources of vitamin C and soluble fiber, and contain multiple nutrients with potent anticancer properties, such as diindolylmethane and sulforaphane. Roughly a quarter pound (approx. 100 g) of cooked collards contains 46 Calories. Researchers at the University of California at Berkeley have recently discovered that 3,3’-diindolylmethane in Brassica vegetables such as collard greens is a potent modulator of the innate immune response system with potent antiviral, antibacterial and anticancer activity.

Source: wikipedia.org
**Broccoli**

**MONTOP F1:** *A vigorous healthy plant with good curd elevation*

**Characteristics:**
- Very vigorous plant well adapted to warm regions
- Suitable for fresh market and processing
- Maturity 60 Days from transplanting
- Head weight 400 grams
- Yield potential 10 fruits per plant; 30-40 tonnes per acre
- Dark green uniform dome shaped heads

**Resistances / Tolerances:**
- Tolerance against hollow core and cat eye

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

---

**Squash**

**RAVEN F1:** *A very dark green cylindrical hybrid squash*

**Characteristics:**
- Vigorous, very productive and open plant
- Produces a constant abundance of exceptionally dark green shiny fruits
- Maturity 43 days from transplanting
- Yield potential 3 tonnes per acre
- Good fruit setting under relatively low temperatures

**Resistances / Tolerances:**
- Tolerance against hollow core and cat eye

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet
Butternut

WALTHAM: A superior Waltham that is highly nutritious

Characteristics:
• Very uniform fruits with a good yield
• Very nutritious with excellent flavour and deep orange coloured fruit
• Maturity 90-100 days from transplanting
• Yield potential 5-6 tonnes per acre
• Excellent shelf life of up to 6 months

Resistances / Tolerances:

Pack Sizes:
10 grams: Foil Packet
25 grams: Foil Packet
50 grams: Tin
100 grams: Tin
250 grams: Tin
500 grams: Tin
1000 grams: Plastic Bag

ATLAS F1: Large uniform fruit excellent for fresh and processing market

Characteristics:
• Healthy productive and very vigorous semi-bush plants
• Less susceptible to diseases and well adapted to hot and cool climates alike
• Maturity 95-105 days from transplanting
• Yield potential 12-18 tonnes per acre
• Fruit weight 203 Kgs
• Very uniform fruit with an excellent shelf life of up to 6 months
• Excellent flavour with attractive orange colour and high sugar content

Resistances / Tolerances:

Pack Sizes:
5 grams: Foil Packet
10 grams: Foil Packet
25 grams: Foil Packet
50 grams: Tin
100 grams: Tin
250 grams: Tin
500 grams: Tin
1000 grams: Plastic Bag

Butternut - Interesting information:

• Butternut squash (Cucurbita moschata), also known in Australia and New Zealand as butternut pumpkin, is a type of winter squash. It has a sweet, nutty taste similar to that of a pumpkin. It has yellow skin and orange fleshy pulp. When ripe, it turns increasingly deep orange, and becomes sweeter and richer. It grows on a vine. The most popular variety, the Waltham Butternut, originated in Waltham, Massachusetts, where it was developed at the Waltham Experiment Station by Robert E. Young.
• It is a good source of fibre, vitamin C, manganese, magnesium, and potassium. It is also an excellent source of vitamin A and vitamin E.

Source: wikipedia.org
Water Melon

BLACK MAGIC F1: *A sweet tasting succulent hybrid water melon*

**Characteristics:**
- Very vigorous plant well adapted to warm regions
- Also ideal green house product for rotation with tomatoes
- Maturity 95 days from planting
- Fruit weight 7-8 Kgs
- Yield potential 10 fruits per plant, 30-40 tonnes per acre
- Very sweet red flesh with high brix
- Deep red colour

**Resistances / Tolerances:**
Downy Mildew
Purple Blotch Tolerance

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

SUGAR BABY: *An excellent open pollinated variety well suited to tropical areas*

**Characteristics:**
- Very attractive product with a high market demand
- Open field variety with low production costs
- Maturity 105 days from planting
- Fruit weight 7-8 Kgs
- Yield potential 20-30 tonnes per acre
- Good heat tolerance and shelf life
- Deep red colour

**Resistances / Tolerances:**
- Downy Mildew
- Purple Blotch Tolerance

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

ANDAMAN 636 F1: *A vigorous hybrid water melon with dark glossy fruits*

**Characteristics:**
- Super red with deep red internal appearance
- Also ideal green house product for rotation with tomatoes
- Maturity 80-85 days from planting
- Fruit weight 8 Kgs.
- Yield potential 10 fruits per plant, 40-50 tonnes per acre
- Very sweet and crispy taste with high Brix of 13
- Very strong vine for easy fruit setting

**Resistances / Tolerances:**
- Downy Mildew
- Purple Blotch Tolerance

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet
Cucumber

ASHLEY: An excellent slicing cucumber

Characteristics:
• A white spined fruit type grown on vigorous plant
• Fruit length: 19 - 21 cm
• Fruit colour: medium dark green
• Maturity: 70 days from transplanting
• Excellent for outdoor and in greenhouse

Advantages / Tolerances:
• Intermediate tolerance to Downy Mildew

Pack Sizes:
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Lettuce

TAINA F1: A crisp head lettuce that is well suited to warmer climatic conditions

Characteristics:
• A crisp head ice burg type hybrid lettuce
• Maturity: 60 - 65 days from transplanting
• Head size: medium - large
• Head colour: medium dark green
• Very good head solidity and uniformity
• Slow reaction to bolting

Advantages / Tolerances:
• Slow to bolt

Pack Sizes:
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet
**Beetroot**

**DETOUR DARK RED:** An excellent standard OP variety, well adapted

**Characteristics:**
- A prolific producer with good heat tolerance
- Fruit shape: globe
- Fruit colour: uniform dark red
- Maturity: 60 - 65 days from transplanting

**Advantages / Tolerances:**

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

---

**Swiss Chard**

**FORDHOOK GIANT:** An excellent standard OP variety

**Characteristics:**
- Very good producer and heat resistant
- Plant Height: 65 cm
- Very dark green colour leaves
- Leaves are large and heavily crumpled
- Maturity: 60 - 70 days from transplanting

**Advantages / Tolerances:**

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
Baby Corn

THAI GOLD: *An excellent true Baby Corn and early maturing*

**Characteristics:**
- Average ears per plant = 3
- Excellent uniform yellow colour cobs, superb quality
- Regular ovule arrangement
- Excellent grade-out
- Maturity 50 days

**Advantages / Tolerances:**
- A true Baby Corn
- High yield
- Intermediate tolerance to Downy Mildew

**Pack Sizes:**
- 1 Kg
- 25 Kg

ZS206: *An excellent variety with good conical shape and uniform cob*

**Characteristics:**
- Average ears per plant = 2
- Good conical cobs with excellent colour
- Excellent cob quality
- Good pod grade-out
- Maturity 90 days

**Advantages / Tolerances:**
- A strong variety well adapted to warm conditions
- Tolerant to Grey Leaf Spot

**Pack Sizes:**
- 1 Kg
- 25 Kg

*How Nutritious Is Baby Corn?*
Baby corn is high in folate, a B-vitamin; four ounces provides 31% of the RDA. It is a good source of several other nutrients too: the same serving size also provides 13 percent of the potassium, 14 percent of the B-6, 10 percent of the riboflavin, 17 percent of the vitamin C and 11 percent of the fiber adults need each day.1

Yellow corn contains carotenoids,2 which are substances that may help prevent coronary artery disease, certain cancers, and cataracts. In particular, yellow corn is abundant in two carotenoids, zeaxanthin and lutein, which keep eyes healthy. The more yellow the corn is, the more carotenoids it contains, since these compounds provide plants with colour. Baby corn, being pale, would carry lesser amounts of these carotenoids than mature corn.
**French Beans**

**SERENGETI: A fine bean with beautiful pods**

**Characteristics:**
- Pod length: 14 - 16 cm
- Pod diameter: 6 - 8 mm
- Pod shape: circular and straight
- Pod colour: uniform dark green glossy
- Plant habit: medium erect bush
- Plant height: medium
- Maturity: 55 days

**Advantages / Tolerances:**
- Good shelf life
- High yields potential
- Strong vegetative plant
- Tolerant to Rust
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds

---

**BOSTON: A fine bean well suited to warmer climatic conditions**

**Characteristics:**
- Pod length: 14 - 15 cm
- Pod diameter: 8 - 9 mm
- Pod shape: circular and straight
- Pod colour: uniform dark green
- Plant habit: medium erect bush
- Plant height: medium
- Maturity: 56 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Strong vegetative plant
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds
ANDANTE: *An extra fine bean with beautiful pods*

**Characteristics:**
- Pod length: 11 - 13 cm
- Pod diameter: 6 - 8 mm
- Pod shape: circular and straight
- Pod colour: medium dark green
- Plant habit: Medium erect bush
- Plant height: medium
- Maturity: 50 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Strong vegetative plant
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds

VENDA: *A fine bean suitable for warm conditions*

**Characteristics:**
- Pod length: 14 - 15 cm
- Pod diameter: 8 - 9 mm
- Pod shape: circular and straight
- Pod colour: uniform dark green
- Plant habit: medium erect bush
- Plant height: medium
- Maturity: 56 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Strong vegetative plant
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds

TANA: *A fine bean with good tolerance to rust*

**Characteristics:**
- Pod length: 13 - 15 cm
- Pod diameter: 8 - 9 mm
- Pod shape: round
- Pod colour: medium dark green
- Plant habit: medium erect bush
- Plant height: medium
- Maturity: 54 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Uniform attractive pods
- Tolerant to Rust
- Tolerant to Bean Common Mosaic

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds
KONZA: *A fine bean with good shape and grade out*

**Characteristics:**
- Pod length: 15 - 17 cm
- Pod diameter: 7 - 9 mm
- Pod shape: round
- Pod colour: Uniform dark green glossy
- Plant habit: medium erect bush
- Plant height: medium
- Maturity: 60 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Uniform attractive pods
- Tolerant to Rust
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds

BELCAMPO: *An extra fine / fine bean with vigorous growth well suited to heavy soils*

**Characteristics:**
- Pod length: 12 - 13 cm
- Pod diameter: 6 - 8 mm
- Pod shape: circular and straight
- Pod colour: Medium dark green
- Plant habit: Medium erect bush
- Plant height: medium
- Maturity: 54 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Strong vegetative plant
- Tolerant to Bean Common Mosaic
- Tolerant to Anthracnose

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds

VOLTA: *An fine bean well suited to warmer climatic conditions*

**Characteristics:**
- Pod length: 13 - 15 mm
- Pod diameter: 8 - 9 mm
- Pod shape: round
- Pod colour: Medium dark green
- Plant habit: Medium erect bush
- Plant height: medium
- Maturity: 54 days

**Advantages / Tolerances:**
- Good shelf life
- High yield potential
- Uniform attractive pods
- Tolerant to Rust
- Tolerant to Bean Common Mosaic

**Pack Sizes:**
- 5,000 seeds
- 100,000 seeds
**LOMAMI:** An extra fine / fine bean with vigorous growth well suited to heavy soils

**Advantages / Tolerances:**
- Dark green seeds
- Constant high yield
- Intermediate tolerance to Powdery Mildew

---

In the mid-19th century, Austrian monk Gregor Mendel's observations of pea pods led to the principles of Mendelian genetics, the foundation of modern genetics. He ended up growing and examining about 28,000 pea plants in the course of his experiments. Mendel chose peas for his experiments because he could grow them easily, develop pure-bred strains, protect them from cross-pollination, and control their pollination. Mendel cross-bred tall & dwarf pea plants, green & yellow peas, purple & white flowers, wrinkled & smooth peas, and a few other traits. He then observed the resulting offspring. In each of these cases, one trait is dominant and all the offspring, or Filial-1 generation, showed the dominant trait. Then he crossed members of the F1 generation together and observed their offspring, the Filial-2 generation. The F2 plants had the dominant trait in approximately a 3:1 ratio. Mendel reasoned that each parent had a ‘vote’ in the appearance of the offspring and the non-dominant or recessive trait appeared only when it was inherited from both parents. He did further experiments that showed each trait is separately inherited. Unwittingly, Mendel had solved a major problem with Charles Darwin's theory of evolution: how could new traits be preserved and not blended back into the population? But Darwin never learned about it. Mendel's work was published in an obscure Austrian journal and was not rediscovered until about 1900.
**Ambassador**

*A standard variety well adapted to warmer climatic conditions*

**Characteristics:**
- Pod length: 10 cm
- Seeds per pod: 9
- Pods: straight and dark green
- Average nodes until first flowering: 14
- Maturity: 75 days

**Advantages / Tolerances:**
- Dark green seeds
- Well adapted to warm climatic conditions
- Very high yield

**Pack Sizes:**
- 1 Kg
- 25 Kg

**Snap Peas**

**Sugar Lady**

*A semi leafless variety with stringless fleshy pods*

**Characteristics:**
- Pod length: 8 cm
- Pods: straight and medium green
- Average nodes until first flowering: 16
- Maturity: 75 days

**Advantages / Tolerances:**
- Uniform attractive pod size
- Stringless
- High yield
- Intermediate tolerance to Powdery Mildew

**Pack Sizes:**
- 1 Kg
- 25 Kg

**Cascadia**

*A standard leaf snap pea variety*

**Characteristics:**
- Pod length: 8 cm
- Pods: straight and dark green
- Average nodes until first flowering: 16
- Maturity: 75 days

**Advantages / Tolerances:**
- Uniform attractive dark green pods
- Well adapted to warmer climatic conditions
- Very high yield
- Intermediate tolerance to Powdery Mildew

**Pack Sizes:**
- 1 Kg
- 25 Kg
Snow Peas

SNOW WIND: A semi leafless variety with outstanding yield and quality

Characteristics:
- Pod length: 9 cm
- Pods: straight, flat and dark green
- Average nodes until first flowering: 16
- Maturity: 72 days

Advantages / Tolerances:
- Straight dark green pods
- Semi stringless
- Intermediate tolerance to Powdery Mildew

Pack Sizes:
- 1 Kg
- 25 Kg

SWEET HORIZON: A semi stringless variety

Characteristics:
- Pod length: 9 - 10 cm
- Pods: straight, flat and dark green
- Average nodes until first flowering: 16
- Maturity: 72 days

Advantages / Tolerances:
- Straight dark green pods
- Semi stringless
- Very high yielding, strong and vigorous plants
- Intermediate tolerance to Powdery Mildew

Pack Sizes:
- 1 Kg
- 25 Kg

OREGON SUGAR POD 11: A leaf variety with good heat tolerance

Characteristics:
- Pod length: 9 cm
- Pods: straight, flat and dark green
- Average nodes until first flowering: 16
- Maturity: 72 days

Advantages / Tolerances:
- Straight dark green pods
- Very vigorous plants
- Intermediate tolerance to Powdery Mildew

Pack Sizes:
- 1 Kg
- 25 Kg
Hot Peppers

BANDAI F1: A very vigorous hybrid producing high yields

Characteristics:
- Very pungent short aromatic fruits with smooth walls
- Strong plants with upward bearing fruit
- Often referred to as ‘Birds eye’ or ‘Rocket’ chilli
- Maturity: 70 - 75 days from transplanting
- Fruit length: 4 - 5 cm
- Diameter: 0.9 cm
- Yield potential: 6 - 7 tonnes per acre
- Harvest period: 2 - 3 months
- Fruits mature from medium green colour to red

Advantages / Tolerances:
- Intermediate tolerance to Bacteria Wilt

Pack Sizes:
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

DEMON F1: A very vigorous variety with a reliable performance in a range of different growing conditions

Characteristics:
- High pungency fruits
- Plants are tall with a concentrated upright bearing fruit set
- Excellent and uniform fruit quality
- Maturity: 70 - 75 days from transplanting
- Fruit length: 7 - 9 cm
- Diameter: 0.9 cm
- Yield potential: 6 - 7 tonnes per acre
- Harvest period: 2 - 3 months
- Fruits mature from medium green colour to bright red

Advantages / Tolerances:
- Good tolerance to common field diseases

Pack Sizes:
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
DAIYA 619 F1: A compact and dense erect plant habit

Characteristics:
- Very pungent fruits
- Compact plants with downward bearing fruits
- Maturity: 60 - 65 days from transplanting
- Fruit length: 5 - 6 cm
- Diameter: 0.9 cm
- Yield potential: 6 - 7 tonnes per acre
- Harvest period: 2 - 3 months
- Fruits mature from dark green colour to bright red

Advantages / Tolerances:
- Good tolerance to common field diseases

Pack Sizes:
- 5 grams: Foil Packet
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

Bunching Onions

GREEN: ISHIKURA: An early maturing bunching onion

Characteristics:
- Long pure white stalks up to 50 cm
- Maturity: 110 days from sewing
- Very good yield with excellent uniformity
- Yield potential: 3 - 3.5 tonnes per acre
- Tender and delicious taste

Advantages / Tolerances:
- None

Pack Sizes:
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag

RED: RED SABRE: Attractive and versatile red skinned variety

Characteristics:
- Mild flavour and crisp texture
- Maturity: 110 days from sewing
- Very good yield with excellent uniformity
- Yield potential: 3 - 3.5 tonnes per acre
- Satisfies the red salad onion market

Advantages / Tolerances:
- None

Pack Sizes:
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
Papaya

SINITA F1: *A gynodioecious papaya hybrid*

**Characteristics:**
- All plants bear fruits. Female fruits are round, and hermaphrodite fruits are oblong
- Average fruit weight: approx. 2 Kgs
- Maturity: 90 - 100 days after transplanting
- Flesh is deep yellow, firm and sweet with 14% sugar content
- Plant habit: semi-dwarf

**Advantages / Tolerances:**
- Intermediate tolerance to Papaya Ring Spot Virus

**Pack Sizes:**
- 100 seeds: Foil Packet
- 500 seeds: Foil Packet
- 1000 seeds: Foil Packet

Asian Vegetables

OKRA: CLEMSON SPINELESS F1: *An excellent standard OP variety*

**Characteristics:**
- Very uniform and prolific producer
- Fruit length 16 cm
- Fruit colour: rich green
- Maturity: 70 days from transplanting
- Fruits are straight, tapered and 5 angled

**Advantages / Tolerances:**

**Pack Sizes:**
- 10 grams: Foil Packet
- 25 grams: Foil Packet
- 50 grams: Tin
- 100 grams: Tin
- 250 grams: Tin
- 500 grams: Tin
- 1000 grams: Plastic Bag
BITTER GOURD KARELLA: NS 1026 F1: *A medium long spindle hybrid Karella*

**Characteristics:**
- A glossy fruit with a very good yield
- Maturity: 40 - 50 days from transplanting
- Fruit shape: medium long spindle
- Fruit length: 16 - 18 cm
- Fruit weight: 120 - 150 grams
- Fruit colour: dark green

**Advantages / Tolerances:**

**Pack Sizes:**
10 grams: Foil Packet

---

RAVAIYA NS 317: *An excellent small purple hybrid*

**Characteristics:**
- Tall spreading plant habit
- Strong plant, cluster bearing fruit
- Maturity: 80 days from transplanting
- Fruit shape: round
- Fruit weight: 70 grams
- Fruit colour: light purple

**Advantages / Tolerances:**

**Pack Sizes:**
10 grams: Foil Packet

---

RAVAIYA NS 787: *An excellent purple long hybrid*

**Characteristics:**
- Tall spreading plant habit
- Cluster bearing plant
- Maturity: 80 days from transplanting
- Fruit shape: long and cylindrical
- Fruit weight: 150 grams
- Fruit colour: purple

**Advantages / Tolerances:**

**Pack Sizes:**
10 grams: Foil Packet
